

I support net neutrality. Net neutrality has allowed innovation from both large and small parties which has helped spur our online economy as well as the larger economy. Net neutrality also allows for diverse sources of information and news to be available to users, which is a vital part of a democracy. Please maintain the open internet in order to allow access as well as spur innovation and our economy for all, not just those who would be able to pay enough to afford it. I support net neutrality.

Thank you.

Sincerely, Eve B. Otten
